Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I am at present preparing a course in the Genetics of microorganisms to be given here next semester and I plan to devote a considerable amount of time to the genetics of bacteria. It would be of great benefit to me if I could have available your original papers. I would appreciate very much being put on your mailing list.

My own work is largely on the inheritance of mating types in *Paramecium* at the present time. I hope soon to have some material published and, if you would care to have them, will be very glad to send you reprints.

Sincerely,

David L. Nanney
